## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or would not have rendered obvious a video signal processing system, such as claimed in claims 1-14, the system having: a first chrominance signal acquisition section for acquiring a second chrominance signal based on horizontal self-correlation of the first chrominance signal, wherein the first chrominance signal acquisition section detects the self-correlation within a range corresponding to the degree of the oblique correlation detected by the oblique correlation detection section.

The closest prior art, Shibutani et al (US 6,809,778) and Kim (US 5,686,972) disclose conventional video signal processing system for separating luminance (Y) signal and/or chrominance (C) signal from a composite video signal the system has vertical and/or horizontal correlation detection circuits, either singularly or in combination, fail to anticipate or render obvious the present invention as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
